Backend & Cloud	Firebase	Google Cloud Platform
Mobile Development	In-App Purchases, Production Deployment	

Professional Experience

Technical Project Manager - GOAT Tradie

Dec. 2024 - Current

Continued with GOAT Tradie after graduating, manting existing responsibilities as Lead Developer and Team Leader of a small permanent team, while expanding into project management and business planning. Oversaw up to six simultanious QUT capstone projects (25+ individuals) alongside stakeholders, responsible for managing onboarding, ongoing business and technical guidance and feedback, reviewing and polishing their work at end of project before bringing it into production. Maintained ownership of all technical aspects with in GOAT Tradie, including code review, testing, optimisation, production deployment, maintenance and planning. Continued to contribute to feature development and core systems improvement.

Projects Delivered - Highlights include eight paid in-app components; three financial toolsets, three office & admin tools, a trades profile test and core subscription. Multiple UI/UX and security improvements, partner rewards integrations, and an internal development toolkit.

Project Ownership - Took ownership of multiple Capstone projects end-to-end as well as owning all internal projects, contributing to project ideation with stakeholders before leading and delivery projects independently.

Business Planning - Collaborated with stakeholders on future planning, primarily focusing on project prioritisation and feature ideation, while also contributing to marketing decisions and partner relationships.

Industry Partnerships - Developed integrations with external companies to allow their members to claim rewards and discounts in app

Process Improvement - Continuously improved onboarding, internal development tools and technical processes, enhancing coordination, consistency and efficiency across multiple teams. Also optimisated core systems including data saving & security.

Lead Full Stack Development - GOAT Tradie

Mar. 2024 - Nov. 2025

Collaborated with GOAT Tradie through a QUT capstone project. Led a team of four developers, owned all technical aspects and delivered a client concept as a fully developed mobile application published on the App Store and Play Store. Delivered core application features including user authentification, in-app purchases, local and cloud data storage, quizzes and multimedia integration.

Technical Planning - Led the establishment of the project's technical architecture from nil, guiding the team's development decisions and development from project setup to production launch.

Documentation - Managed all technical documentation for the project.

Testing - Led end-to-end testing, including unit, manual, regression, release and user testing

Client Relations - Led collaboration between student development team and industry partner.

Education

Bachelor of Information Technology - Queensland University of Technology — 2023 - 2024
